

User Manual

What is this game about?

Since 2003, York has its own annual Dragon Boat Challenge on the River Ouse, on the course from Scarborough Bridge to Lendal Bridge. Every year, many teams compete to be the fastest dragon on the river and win the gold medal. York Rotary Club has been running Dragon Boat Challenge for 14 years and raised over £940,000 for 170 York and Yorkshire charities.

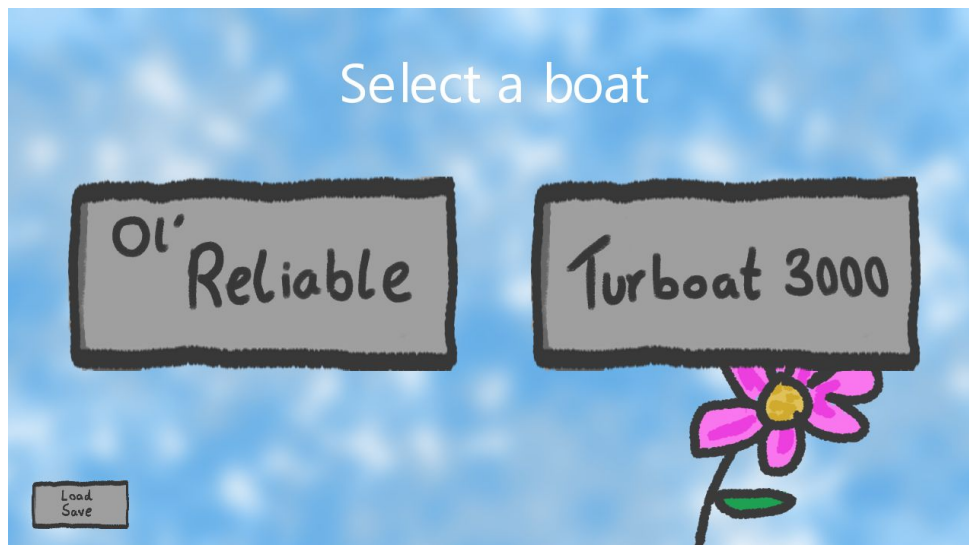

Now you will be able to experience it anytime and anywhere. You will do 3 legs and the best accumulated time wins.

The options screen and starting the game

Here you are able to select the option of fullscreen and the difficulty (highlighted red).

Choices are easy, medium or hard difficulty. The three things that will affect is poweup spawn, NPC boat speed, and the obstacle count. Don't be fooled by the easy difficulty though.

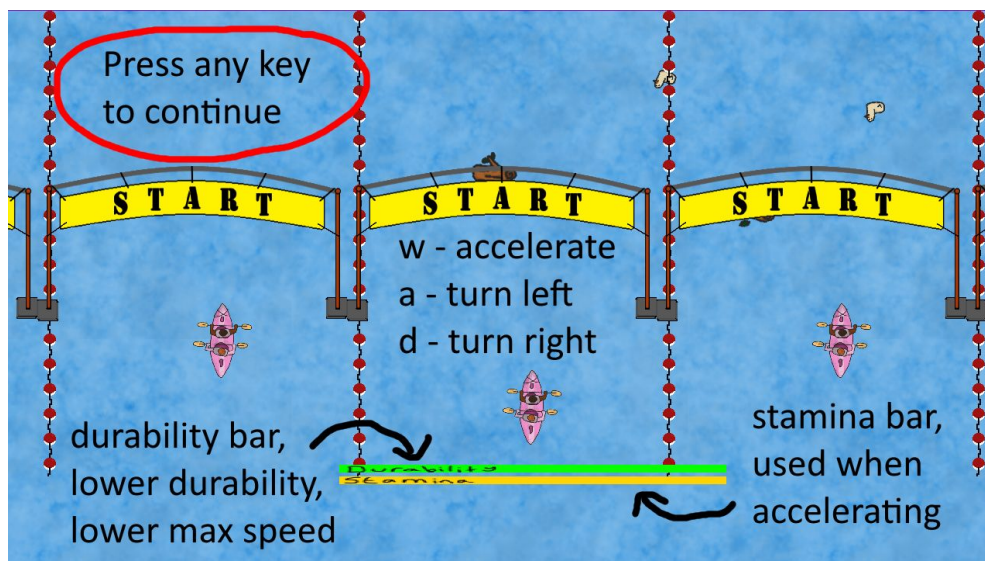

Selecting a boat- There are two boats in this game. Ol' Reliable after it's name offers a balance between durability and stamina. Turboat 3000 Offers higher top speeds but at a cost of lower durability.

Load Save - You must have previously saved the game to use it. The save file will appear in the folder of .jar file.

Save game- will appear after finishing a leg.

More detail

Upon selecting a boat there will be a quick tutorial shown.

Avoid the obstacles to not lose durability and not to slow down.

Holding W to accelerate will use up stamina.

Don't use up all the stamina as you will find it difficult to regain momentum in the race.

Stay in lane!! Going over the lane buoy will cause you to incur a penalty.

You can only accelerate when the stamina bar is yellow.

Top tips

- Cheat and go over the lane. If you think the power up across is good enough to make up for the penalty.
- Finish first

Upgrades

(From left to right)

- 1) Decrease your time
- 2) Increase your durability if damaged
- 3) Regain some stamina if lost
- 4) Boost in speed
- 5) Teleport closer to the finish line
